

OIM-CE

OIM - Controlling Emergencies

This assessment program is designed for Offshore Installation Managers (OIM), Superintendents or Person In Charge (PIC) who are designated as Incident Managers in Controlling Emergencies on Offshore Installations.

General Course Objectives

To introduce the underpinning knowledge required by members performing the roles within the EMT and CMT groups. The program is bespoke where possible to synchronise what industry best standards are and how the company works within the guidelines of the industry and legislative requirements.

To review documentary evidence sufficient to meet:

- Element 1.1 – Maintain a State of Readiness

To assess through practical simulation:

- Element 1.2 – Assess the Situation and Take Effective Action.
- Element 1.3 – Maintain Communications.
- Element 1.4 – Delegate Authority to Act.
- Element 1.5 – Manage Individual and Team Performance.
- Element 1.6 – Deal with Stress in Self and Others

Course Content

- Well Control Incident
- Explosion and Fire
- Accommodation Fire
- Helicopter Incident
- Pipeline Incident
- Collision or wave damage causing structural collapse
- Loss of Stability (floating installations)

Each of the exercises will have a level of difficulty, assessors will observe the exercises and gather raw evidence on the candidates performance, this evidence will then be converted into specific comments, recommendation and ratings against each performance criteria, and the exercise as a whole.

Accrediting Body:

OPITO

Course Duration:

2 Days

Course Validity:

Recommended 3 Years

Course Venue:

Cilegon / Online
